**BREEDERS GROUP: Mrs Joylene Neddermeyer – Victoria**

**BREEDERS GROUP WINNER BRUANGIE KENNELS MRS V CORLETT.**

It was with much pleasure I was asked to assess the Breeders Group at this. All three groups were from very well established and successful kennels in South Australia. All groups were of a very high standard with very well constructed animals within the group. It was particularly pleasing to note that all of the animals presented were from two breed surveyed parents and all three kennels totally support the German Shepherd Dog Council of Australia Breed Improvement Schemes.

Two of the groups consisted of all females while the other group consisted of two males and three females.

The winner of the Breeders Group for 2007 is Bruangie Kennels. The group was represented by 4 sires and 3 dams and displayed a very good uniformity of type. The animals were well constructed, of slightly long body proportions, well moulded croups which ideally could be a fraction longer. Good fore and very good hindquarter angulation. Good overall firmness. Particularly pleasing in this group was the very good uniformity of type, very good pigmentation with good head and expression and good eye colour. A very good group with a very good degree of difficulty and particularly pleasing is the very good uniformity of type. Congratulations to Velga Corlett for presenting a very worthy group Congratulations

The group from Rhosyn Kennels consisted of animals from 2 sires, and 5 dams. The group consisted of very well constructed animals of very good type, good overall firmness, good fore and very good hindquarter angulation with slight restriction in the length and lay of the croup. Good firmness of joints. In some cases the gold could be a little more intense. A very pleasing group – Congratulations.

The group of Vonpeta Kennels consisted of two grey sable and three black and tan animals and this is not ideal for presenting a breeders group. The animals came from 3 sires and 3 dams which displayed a very good degree of difficulty. The group consisted of very well constructed, firm and dry bitches with good fore and very good hindquarter angulation, good toplines, slight restriction in the length and lay of the croup and firmness of hock joints. A very pleasing group. Congratulations.
