16½ months. 60cm. A large, medium strong, slightly elongated, black and gold female of good type. Good head and expression where the eye should be a fraction darker and the neck should be a little longer. Level wither, firm back, slightly short but well moulded croup. Good forequarter where the upper arm should be longer and better angled, very good hindquarter angulation. Good fore and underchest. Stands not quite correct in front, steps correct at rear, the elbows should be tighter. Displays a good sequence of steps, however the reach should be a little freer, and she should be a little tighter in ligamentation.

16½ months. 66cm. A very large, strong and substantial, well proportioned, black and gold male of good type. Strong masculine head where the eye should be a little darker, the neck should be longer. High wither, firm back, short, steep croup, the tail is set just a little high. Ideally the upper arm should be longer and better angled, slightly steep shoulder blade, very good hindquarter angulation. Good fore and just slightly short in underchest. Stands not quite correct in front. Steps narrow at rear, the hock joints should be tighter and the elbows should be firmer. Shows very good drive and reach with a good sequence of steps and maintains a good overline.
